Abstract

Here are some characteristics of the manuscript studied.

The relationship between body height and weight toward blood sugar level in the teen athletes

No.	Section	Comments
1.	Title and Abstract	1. The statements of each section must be as appropriate written by regarding their University, Institution, or any other relevant background.
2.	Abstract	1. Please follow the IJBS/RAD methods or without the abstract of existing articles. 2. The keywords should be better written by using 3-5 words.
3.	Introduction	1. Consider discussing the primary variables identified as the focus of this study regarding the relationship between body height and weight toward blood sugar level in the teen athletes. 2. Mention whether the effectiveness of previous studies and the current work.
4.	Methods	1. Consider describe the statistical analysis method and software used in this study.
5.	Results	1. The writer do not write an abstract based on other positions. Consider using this form.
6.	Discussion	1. Do not repeat the results of the calculation section. It was necessary for discrepancy between the data findings and the previous studies.
7.	Conclusion	1. Consider explaining what is the primary indicator in this study.
8.	References	1. The writer should the "International Organization for Standardization" format.

## Commentary

Dear Sir/Madam,

Here are some commentaries to the manuscript entitled:

**“The relationship between body height and weight toward blood hemoglobin level in the teen athletes”**

No.	Section	Commentary
A	Title and Affiliation	1. The affiliation of each author needs to be appropriately written by suggesting their University, Institution, or any other relevant background.
B	Abstract	1. Please follow the IMRAD methods in written the abstract of research articles 2. The keywords supposedly better written less than 5 words.
C	Introduction	1. Consider determining the primary outcome expected to be found in this study regarding the relationship between body height and weight toward blood hemoglobin level in the teen athletes. 2. Please mention the discrepancy of previous studies and the recent study.
E	Methods	1. Consider determine the statistical analysis method and software used in this study.
F	Results	1. The tables are not written adequately based on author guidelines. Consider fixing this issue.
G	Discussion	1. Do not repeat the results in the discussion section. Please focuses on the discrepancy between the recent findings and the previous studies.
H	Conclusions	1. Consider explaining what is the primary outcome in this study.
I	Table, figure and Reference	1. Our journal adopts the “Vancouver Superscript” as the choice of citation format. Please format your <i>inline citation</i> and <i>bibliographic</i> as an example given below in:  --Inline citation--
