Dear I Nengah Laba,

Please find the review result of your research paper as per attached file.

Please, resubmit the revised version by Tuesday, 2 August 2022.

Best Regards,

Dr. I Gede Astawa, M.Hum.

Editor-in-Chief

International Journal of Linguistics and Discourse Analytics

Dear Author,

The author has made an interesting contribution to the field, but the study is limited by a small sample size. It would be helpful to discuss the implications of this limitation and suggest ways to overcome it in future research.

Overall, the manuscript provides valuable insights. The author presents a clear and concise argument. However, I would recommend that the author addresses some of the inconsistencies in the data and provide more detail on the methods used to ensure the validity of the results

Reviewer 1

Dear Author,

The research question is interesting and the methodology is appropriate, but the results are inconclusive. The author should provide a more detailed discussion of the limitations of the study and suggest directions for future research.

The article is not well-written yet. Please, revise some grammar, e.g. subject-verb agreement, the use of prepositions. The methodology is sufficient, but the data analysis could be more robust. The authors should consider using additional analysis to confirm the research findings.
