

ANALISIS HUBUNGAN ANTARA KERUSAKAN BERKAS REKAM MEDIS TERHADAP ASPEK KEAMANAN DAN KERAHASIAAN REKAM MEDIS DI RUANG PENYIMPANAN RUMAH SAKIT WISMA PRASHANTI KABUPATEN TABANAN

ABSTRAK

Rekam medis adalah kumpulan berkas yang berisikan tentang informasi pasien, hasil pemeriksaan, hasil diagnosis dan segala dokumentasi penting di bidang kesehatan. Maka dari itu rekam medis harus dijaga keamanan dan kerahasiaannya dengan baik. Faktor yang paling penting dibidang rekam medis seperti pengelolaan rekam medis adalah aspek keamanan dan kerahasiaan. Tujuan penelitian ini adalah untuk mengetahui hubungan kerusakan berkas rekam medis terhadap aspek keamanan dan kerahasiaan rekam medis di ruang penyimpanan rumah sakit Wisma Prashanti Kabupaten Tabanan

Rancangan penelitian yang digunakan adalah metode deskriptif kualitatif. Sample dalam penelitian ini yaitu rekam medis yang rusak dan petugas yang terlibat langsung dalam pemeliharaan rekam medis yang berjumlah 7 orang di RS Wisma Prashanti Kabupaten Tabanan. Penelitian ini dilakukan dengan melakukan wawancara dan observasi.

Hasil Penelitiannya pada bulan April dan Mei tahun 2023 dalam aspek Keamanan dan kerahasiaan rekam medis di ruang filing RS Wisma Prashanti kabupaten Tabanan belum sepenuhnya terlindungi. Berdasarkan penelitiannya didapatkan 200 rekam medis yang rusak, serta sarana dan prasarana belum terjamin aman seperti aspek keamanan masih terdapat 200 rekam medis yang rusak dan ruangan yang sempit, berdebu dan lembab. Sedangkan dalam aspek kerahasiaan masih terdapat pendistribusian rekam medis belum terjaga dengan baik dan masih beberapa rekam medis yang hilang.

Kesimpulan penelitian ini adalah kerusakan berkas rekam medis di ruang filing RS Wisma Prashanti Kabupaten Tabanan sangat berpengaruh terhadap aspek keamanan dan aspek kerahasiaan rekam medis

**ANALYSIS OF THE RELATIONSHIP BETWEEN DAMAGE TO MEDICAL
RECORD FILES AND ASPECTS OF SECURITY AND CONFIDENTIALITY
OF MEDICAL RECORDS IN THE STORAGE ROOM OF THE WISMA
PRASHANTI HOSPITAL, TABANAN DISTRICT**

ABSTRACT

Medical records are a collective of files containing patient information, examination results, diagnosis results and all-important documentation in the health sector. Therefore, medical records must be kept safe and confidential properly. The most important factor in the field of medical records such as medical record management is the aspect of security and confidentiality. The purpose of this study was to determine the relationship between damage to medical record files and aspects of security and confidentiality of medical records in the storage room of Wisma Prashanti Hospital, Tabanan Regency.

The research design used was descriptive qualitative method. The sample in this study were damaged medical records and officers who were directly involved in maintaining medical records totaling 7 people at Wisma Prashanti Hospital, Tabanan Regency. This research was conducted by conducting interviews and observations.

The results of his research in April and May of 2023 in the aspect of security and confidentiality of medical records in the filing room of Wisma Prashanti Hospital, Tabanan Regency have not been fully protected. Based on his research, 200 damaged medical records were obtained, and facilities and infrastructure were not guaranteed to be safe, such as the security aspect, there were still 200 damaged medical records and a narrow, dusty and humid room. While in the aspect of confidentiality there is still a distribution of medical records that has not been properly maintained and there are still some missing medical records.

The conclusion of this study is that damage to medical record files in the filing room of Wisma Prashanti Hospital, Tabanan Regency greatly affects the security and confidentiality aspects of medical records.
